

The Next Generation Of Sustainable Coated Paper

Dunn's newest and most innovative product to date is taking everything you know about paper, stripping it down, then building it back up again!

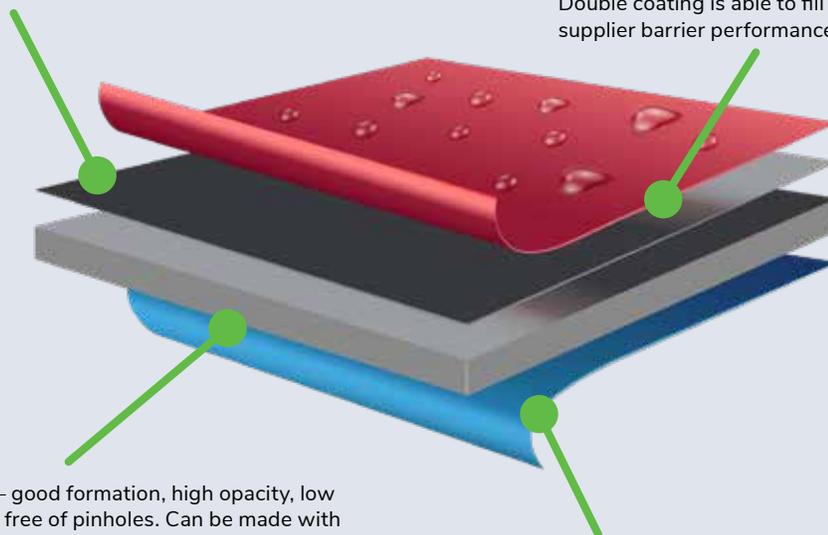

We've flipped traditional chemistry on its head and "rebuilt the paper from the ground up," starting with nothing but fiber and water, then using bio-based methods to enhance its functionality.

The result? The most eco-friendly paper grades available in North America!

Patented Technology. Unstoppable Innovation.

First in-line coating – provides an effective film barrier with low porosity to prepare for the top coating application. Can be customized for target properties of oil/grease resistance and moisture vapor barrier.

Second in-line-coating creates the final surface that achieves the highest levels of functional oil/grease barrier and optional moisture vapor barrier. Double coating is able to fill all voids providing superior barrier performance.

Base sheet – good formation, high opacity, low porosity and free of pinholes. Can be made with virgin market pulp or Dunn "valu", a percentage of FDA approved recycled fibers. FSC and SFI certification available. Colors and natural available.

On basis weights above 34#, a **back-side treatment** can be applied for oil/grease resistance on both sides.

Unparalleled Paper Grades for People, Planet, and Profit.

For nearly a century, Dunn Paper has been a leader in the industry, helping brands and converters meet their sustainability goals by matching their needs to the best available paper and tissue on the market; but in all this time, we have never been more excited to introduce a new product like BiOrigin™!

PFAS CHEMICAL-FREE

PFAS chemicals are on the FDA's radar (and ours!) to sunset by 2023... but why wait? BiOrigin™ has vowed to go PFAS-free now, opting for specialty coatings that meet certification requirements for renewability, recyclability, and compostability.

COST-EFFICIENT

BiOrigin™ is better for the environment and for your wallet! let us show you why our newest line is truly a win-win for brands and converters across North America.

GREASE, MOISTURE, AND OXYGEN-RESISTANT

Dunn's industry-leading grease, moisture, and oxygen barriers pair with the latest technology in coated paper for an innovative product that's second-to-none.

READY TO BRAND

Function meets fashion to help give your brand the shelf-appeal it deserves. No matter the coating or barrier, BiOrigin™ paper is readily printable with your preferred branding, pattern, and design.

Go ahead, get creative – BiOrigin™ makes great:

Bakery Bags

Sandwich Wraps

Tray / Basket Liners

Clamshell Containers

Label Face Stock & Release Liners

Chip Bags

Soup & Sauce Packets

Retail Bags & Satchels

With thousands more applications across countless industries.
